

Teoresi spa

Province:	Torino
Web site:	www.teoresigroup.com
Sectors:	System integrator, Services, R&d, studies, engineering, Modelling, simulation, calculation, Design, Prototyping
Company activity:	With over 25 years of proven engineering experience, we are active in developing innovative mechatronic systems that integrate advanced technologies from a number of engineering disciplines. One of Teoresi's core engineering strengths is our expertise in the Model Based Design approach. The MBD methodology drastically reduces production time by shortening the design, development and validation phases while increasing system reliability. The advantages of this approach are that issues and improvements that need to be addressed can be done before the system is actually built. This means fewer prototypes will need to be constructed, cost and time will be reduced, and there will be a dramatic reduction in errors.
Turnover:	10.100.000,00 €
N. of employees:	235
Contact languages:	English , French, Spanish
