

## bMooble

<b>Province:</b>	Torino
<b>Web site:</b>	www.bmooble.com
<b>Sectors:</b>	System suppliers, Control and command systems, Mechatronics systems, Data acquisition, processing and treatment systems
<b>Company activity:</b>	Extended SCADA bMooble platform: The bMooble technology is based on a three tier architecture. It allows organizations to effectively design and deploy extended SCADA (Supervisory Control and Data Acquisition) systems for a variety of remote monitoring and control processes in manufacturing, energy and environment control, e-health, remote metering and alerting to name a few. The bMooble software platform is composed of different components residing in the cloud and able to access existing systems and sensors over IP (Internet protocol). Through the platform organizations can design their own control logic integrating existing signals coming from sensors, PLC's, local plants and machines at the field level to provide a higher level of monitoring and control processes on a geographic scale allowing their users to remotely connect using their own mobile devices. The technology is available to the customers either in traditional license mode or as PaaS (Platform as a Service) to those organizations who want to offer remote monitoring and control services to their customer based on the SaaS (Software as a Service) model. Areas of application: - Manufacturing - Domotic - Environment - Energy - e-health
<b>Turnover:</b>	-
<b>N. of employees:</b>	6
<b>Contact languages:</b>	English , German
<b>For information:</b>	Guido Colombo gcolombo@bmooble.com - 011 2303625

### The company is active in the following projects:

- PIF Automotive
- ECompanies: Go green with Torino Piemonte Italy
- Torino - Piemonte Railway The complete rail infrastructure and rolling stock supply chain
- Think Up. Advanced ICT Solutions from Torino-Piemonte
- Infrastructure & Logistics
- InTO MECH. Mechatronic Excellence from Torino Piemonte
- Piemonte Health & Wellness
